

Mangomind delivers the security, reliability, and ease of use essential for any size enterprise.

- Workgroup Collaboration
- Remote File Access
- Enterprise Security
- Enterprise Reliability
- Easy-to-Use
- Hosted Service or Licensed Server Software

The Secure, Reliable Internet File Service for the Enterprise

Mangomind Enterprise is a Windows Business Internet File ServiceSM that allows LAN-like file sharing between external business colleagues, mobile professionals and others within and outside the corporate firewall.

Mangomind Enterprise complements existing network infrastructure by minimizing VPN access requirements for remote employees and enhances corporate security by minimizing remote network access requirements for non-employees.

Mangomind Enterprise is available either as a scaleable, hosted service or as a licensed server software product for organizations of any size. It can be easily implemented within the existing network infrastructure and data center.

Workgroup Productivity

Remote file access: Geographically dispersed workgroups can access business critical files from anywhere, at any time, from any computer.

Multi-user file sharing: Workgroup members can simultaneously access documents and databases online at any time.

Offline access to files: Workers can access Mangomind files even when they are not connected to the Internet.

Secure messaging: Send messages instantly to others on the shared Mangomind Drive.

Easy to use Windows operation: As a true Windows file system, Mangomind operates just like a Windows "C" drive. No user training is required.

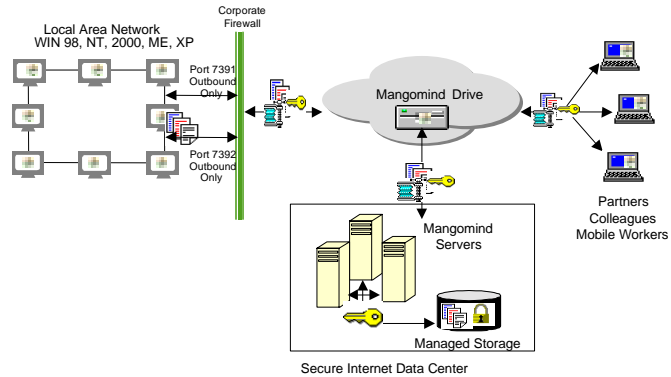

Supports all Windows platforms: Mangomind works on Windows 95, 98, ME, NT, 2000, and XP.

Secure data back-up service: All files stored on a Mangomind Drive are backed-up and recoverable at the secure Internet Data Center.

Enterprise Reliability

Mangomind Hosted Service

Secure information back-up system and high availability storage.

The Mangomind Enterprise service is hosted at a secure, Tier 1 Internet Data Center. Mangosoft has attained Service Level Agreements that guarantee 99.97% uptime for their network and data center facilities.

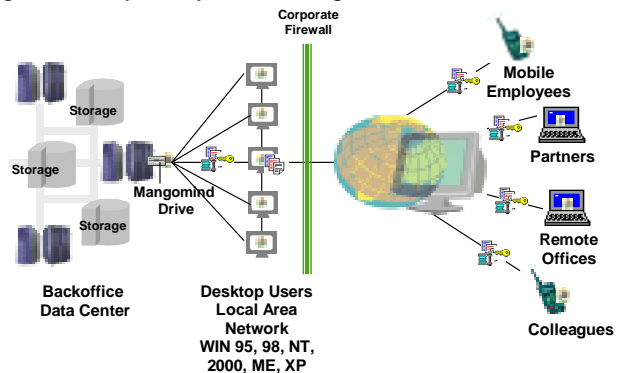

Mangomind provides reliable, high-performance, fault-tolerant enterprise disk storage. The storage solution is configured as a SAN (Storage Area Network) to provide a scalable, no single point-of-failure infrastructure to support the Mangomind service. An automatic tape library provides a backup and recovery solution.

Web-based Enterprise User Administration

Mangomind Enterprise provides flexible resource via an easy to use Web-based administration tool. Administrators can create new or replace Drives no longer needed, and add or change invited users to meet changing project requirements.

Mangomind Enterprise Licensed Server Software

Integrate easily into your existing network and data center.

Enterprise Security

Mangomind incorporates the most rigorous Internet security technology and protocols to ensure that only authenticated users can access documents:

- End-to-end file security with 128-bit encryption (RSA Security) on files while they are transferred over the Internet and while they are stored on the Mangomind server.
- Public/private key encryption ensures user authentication.
- Files and folders can be further protected with file access controls and permissions.

The Mangomind Enterprise Server solution provides a secure front end to the Storage Area Network and can be easily incorporated into the existing back office infrastructure. Mangomind Enterprise server includes the Mangomind Server and Management Console. The Web administration console is optional. Mangomind Enterprise also supports a high availability, clustered services option.
