

Mangomindsm for M&A Professionals

Efficient document sharing and project management speeds the M&A transaction process.

◆ **Transfer confidential information to interested parties.**

Mangomind security allows the transfer of confidential information regarding the transaction to interested parties anywhere in the world.

◆ **Consolidate due diligence.**

Mangomind provides a central place where all members of the transaction team can review information critical to the transaction.

◆ **Easily collaborate on critical documents.**

Edited documents are easily copied to the Mangomind drive where team members can immediately review comments. No lost time due to printing documents and delivery by overnight mail or couriers

◆ **Quickly review agreements.**

Post analyses and reports on the drive for review. Continue to access and review documents even when not connected to the Internet.

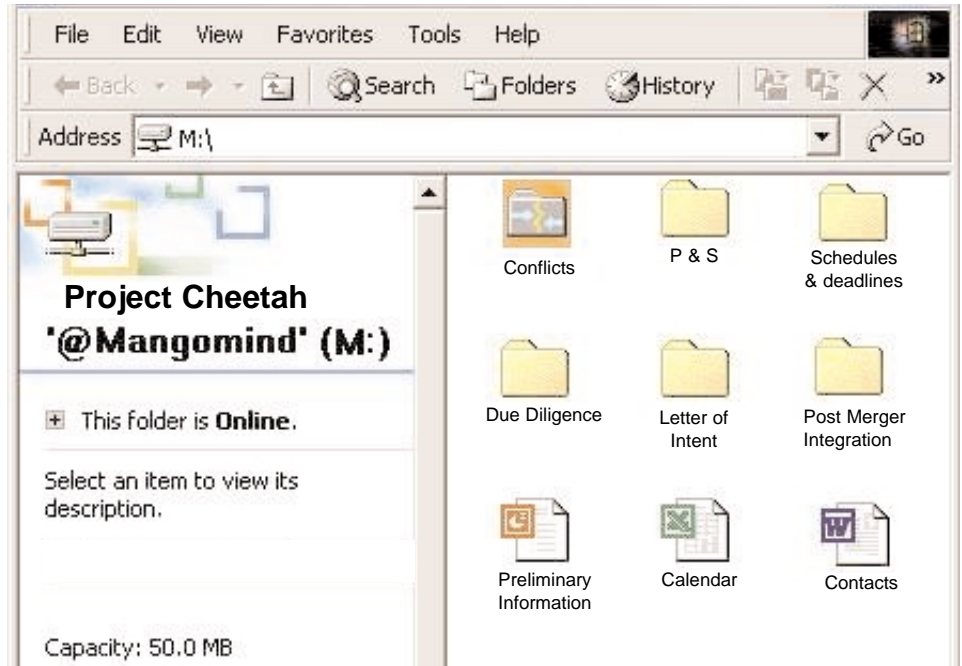

◆ **Speed post merger integration.**

New integration team members can join the Mangomind drive and immediately access all relevant information to speed integration.

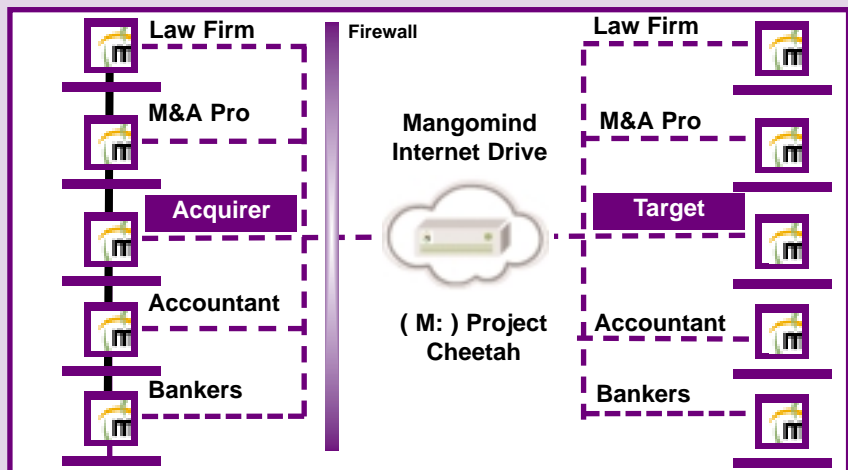

About Mangosoft

Mangosoft delivers Internet business-enabling software solutions that make external business communication and collaboration a powerful strategic advantage. Through its Mangomind Internet business file sharing service, Mangosoft allows business collaborators to leverage the communication power of the Internet to make smarter, faster business decisions.

Mangomind consolidates information and keeps participants up-to-date on transaction schedules, responsibilities and deadlines.

Mangomind streamlines the M&A process by allowing all participants to access and share information from a single location.

All critical information pertaining to the M&A project is accessible to the entire project team, regardless of their geographic location. Qualified users have immediate access to the latest versions of the critical documents, such as the Letter of Intent, Purchase and Sale agreement, etc. All information is encrypted and secure, available to only those who have been given access permission.
